

Version Matrix

This page contains the version matrix for the Client Certificate Authenticator solution.

- If the version is not on the list, it is not supported
- Go2Group assumes that the add-on works because the code compiles against x.y. If it does not work for any x.y.z, please raise a support ticket at our [JIRA instance](#)
- Strikethroughs on the App version(s) means that we do not support that version anymore
